

Other MARC Business

- Laboratory Engineering and Equipment
 - MARC specialises in consultancy, design and supply of turnkey laboratories throughout the world. MARC also design, manufacture and supply laboratory equipment and consumable for analytical and metallurgical laboratories.
- Sampling Equipment
 - MARC manufactures a wide range of primary, secondary and inventory sampling systems for wet and dry applications. These systems can be application specific with partial or full automation and interfacing.
- Dust and Fume Control
 - MARC undertakes consultancy, design, manufacture, installation and commissioning in engineering and technologies associated with the improvement of air quality and general air movement to protect and enhance natural, human and industrial environments. This includes industrial sites, refineries, mines, and manufacturing and general ventilation industries.
- Custom Engineering
 - MARC specialises in consultancy, design, manufacturing, installation and commissioning of fully and semi automated engineered products for unique applications in sample preparation and sampling systems.

CONSUMABLES AND SPARE PARTS DIVISION

MARC Technologies is a unique organisation specialising in the establishment and support of turnkey analytical and metallurgical laboratories primarily for the mineral and oil & gas industries.

MARC Technologies employ qualified chemists, process engineers and metallurgists who can provide advice and assist with your specific site laboratory consumable and equipment requirements.

We have over 100 years of combined analytical knowledge dedicated to support and service your Laboratory requirements. We know that every laboratory has its own particular needs, so our goal is to provide personalised assistance and advice along with reliable, trusted, innovative, safe and competitive solutions.

“Proudly Supplying and Supporting the Laboratory Industry”

LABORATORY CONSUMABLES

CHEMICAL REAGENTS

To assist you in developing and streamlining your analytical techniques MARC Technologies has the ability to source specific quality chemicals to suit your requirements.

MARC Technologies can also cater for your everyday reagent requirements at competitive pricing.

GLASSWARE & PLASTICWARE

MARC Technologies can source all of your everyday laboratory glassware and plasticware needs through our international supply network.

PERSONAL SAFETY EQUIPMENT

MARC Technologies aims to provide a "total solution approach". To achieve this MARC Technologies also supply safety equipment to ensure your Laboratory complies with OHS regulations.

MARC Technologies has a wide range of safety products including Personal Protective Equipment (PPE), Signage right through to dangerous goods storage cabinets.

This includes: clothing, personal safety equipment such as head & face protection, hearing protection, respiratory protection, gas detection, hand protection, first aid & sun protection, workplace safety equipment, storage equipment, industrial supplies and all staff amenities and more.

FILTERS AND FILTER PAPERS

MARC Technologies can provide the analytical, life science and health industry laboratories with solutions for all filtration and separation applications.

ASSAY CONSUMABLES

With our wealth of in-house experience and our on-going exposure to the latest in laboratory technology and advances, MARC Technologies can provide advice and support for all your assay requirements.

MARC Technologies has designed, equipped and commissioned over 100 analytical laboratories worldwide. It is this experience that places us ahead of the rest.

LABORATORY EQUIPMENT

MARC Technologies is also a recognised manufacturer and supplier of laboratory equipment. MARC Technologies provide a complete range of laboratory equipment for turnkey laboratory projects in the mineral and oil & gas industries. This includes items such as Drying ovens, filter presses, sample dividers, drying racks, benches, trolleys, and more...

EQUIPMENT SPARES AND SERVICE

MARC Technologies understands equipment downtime can be a significant cost burden to an operating laboratory. We carry a comprehensive range of Spare Parts to suit all of our manufactured equipment. MARC Technologies also stocks critical spares for our major partners ie. parts for laboratory instrumentation, fume and dust control.

With our in house engineering capability we can provide prompt, direct support and advice with all spare parts inquiries.

Our Service Department can also assist with minimising equipment downtime by developing a regular scheduled maintenance program for your Laboratory.

LABORATORY INSTRUMENTATION

MARC Technologies in association with our world-renowned technical partners can supply all of your laboratory instrumentation. This includes:

- Carbon & Sulphur

Analysers

- Cyanide Analysers
- TGA Machines
- XRF Spectrometers
- XRD Spectrometers
- ICP-OES Analysers
- ICPMS Analysers
- AAS Spectrometers
- Gas Chromatograms
- UV Vis Spectrophotometers
- Auto Titrators
- Balances
- and more.....

For a more detailed list contact one of our experienced in-house chemists, metallurgists or process engineers who can assist and support in selecting the correct instrumentation for your Laboratory.

FUME & DUST CONTROL CONSUMABLES
